Directions for Ordering

Purchase orders for photographic prints, lantern slides, and bromide enlargements should be made on the firm holding the contract and forwarded to the Extension Service, U. S. Department of Agriculture. Purchase orders should include the negative numbers of all Department negatives selected, listed in numerical order. The subjects of photographs should also be given opposite each negative number to avoid error. Do not send money or check with purchase order, as completed material will be delivered with bill for total amount. Payment should be made promptly to the firm executing order. Allow a reasonable length of time for delivery of completed order.

FILM STRIPS

Contracting firm: Photo Lab, Inc., 3825 Georgia Avenue, Washington, D. C.

For the extension worker who desires to organize his own series from local photographs - and many workers are doing this now - the contract prices for the fiscal year ending June 30, 1940, are as follows:

Making of negative from	
original photographs	Per frame 10 cents
Printing of legends	Each 10 cents
Printing of subtitles	Each 25 cents
Printing of tables	Each 50 cents
Trimming and mounting of legends	Each 10 cents

The Department has available about 325 film-strip series on agricultural and home-economics subjects for purchase at prices varying from 50 to 70 cents each, depending on the length of the strip. Prices for the majority of the Department's series are 50 and 55 cents each when single prints are ordered. Slightly lower prices are charged when two or more copies of a series are ordered. These quantity prices will be supplied on request.

Price lists, hints on the preparation of original material for film-strip production, and information regarding film-strip projection equipment may be obtained by writing direct to the

PHOTOGRAPHS OF FARM AND HOME

Compiled by the Visual Instruction and Editorial Section
Extension Service, U. S. Department of Agriculture

It has been stated that approximately 40 percent of conceptual learning may be attributed to visual experience.

There is no doubt that visual aids increase
Pictures Pay tremendously the effect of verbal instruction.

Spoken or written language may arouse in the listener's or reader's mind effects that are widely varied. Photographs, on the other hand, speak a language understood by all. Not only do good photographs portray the actual situation with little excuse for misunderstanding, but they arouse interest and help to stimulate action. It is only natural that we are more interested in concrete and realistic things that we can readily comprehend than in abstract and symbolic things that are difficult to understand. To combine the concrete with the abstract, the pictorial with descriptive language, achieves the greatest amount of understanding. Consequently, photographs have come to take a most effective part in extension work. Extension agents are using them more and more in publications, news stories, magazine articles, circular letters, posters, film strips, exhibits, window displays, and the like.

For years the visual instruction and editorial section of the Department of Agriculture Extension Service has collected farm and farm home photographs. The vast
Thousands of majority of the photographs were taken by the extension photographer working in cooperation with
Photographs the extension editors in the various States. The
Available collection now consists of approximately 50,000 cataloged and indexed pictures which cover practically every phase of agriculture and home economics.

As a means of opening up this large source of pictures for extension use in the States, this catalog of a few of the many available photographs was compiled. Pictures
Use Local taken locally by the extension agent are, of
Pictures When course, the most useful and practical. Every effort should be made to use local photographs when
Possible it is possible to do so. The best use that can be made of this catalog is for the selection of photographs when the required subjects are not available locally or when it is desired to supplement local pictures.

This catalog is divided into two parts. The first part contains photographic layouts which are arranged alphabetically by subjects. Since many of the photographs in the picture library are not represented in the layouts, a second list was prepared which gives some idea of the variety of subjects available.

How to Use
This Catalog

You will find this list at the end of the catalog. It should be remembered that the picture layouts in this catalog include miniature reproductions of large photographs, some of them 5 by 7 inches in dimension, but most of them $6\frac{1}{2}$ by $8\frac{1}{2}$ inches. The layouts were multilithed and in no way suggest the quality of the prints, which is entirely suitable for any purpose. Not only is it possible to obtain large contact prints of the miniatures illustrated in the layouts, but prints of the layouts themselves may be procured. These are 8 by 10 inches in size and negative numbers of them will be found in the list of photographic layouts under the respective titles. Bromide enlargements of the individual pictures or of the complete layouts may also be obtained.

To supply the need of extension workers for illustrative material, arrangements have been made with various commercial firms which make it possible for extension agents or cooperating individuals or organizations to purchase contact prints, bromide enlargements, uncolored glass lantern slides, and film strips made from the

For Your
Convenience

negatives in the files of the visual instruction and editorial section. To make certain that extension workers would have the advantage of low prices, competitive bids were obtained. Prices are given on the enclosed price list. They are only for the fiscal year indicated and are subject to change at the end of each year. Prices of photographic prints vary in accordance with the sizes of the negatives from which they are made. Most of the pictures illustrated in the catalog come $6\frac{1}{2}$ by $8\frac{1}{2}$ inches in size.

Purchase orders should be made out to the firm holding the contract and should be forwarded to the Division of Cooperative Extension, United States Department of Agriculture, for approval. The Department will then arrange to lend the necessary negatives so that the firm can do the work. Orders submitted by county extension

Photographs

agents should bear the approval of the State extension director. The purchase order should include the negative numbers of the photographs selected which should be listed in

numerical order to facilitate assembling them. The legends of the photographs should also be given opposite each negative number to avoid possible error and insure that the pictures which have been selected are obtained. Negative numbers and legends are found at the bottom of each layout.

Money or check should not be sent with the purchase order to the contracting firm. When the order is completed the material will be delivered with a bill for the total amount. After the material has been delivered payment should be made promptly to the firm executing the order. Do not send money or checks to the Department. Transactions of this kind should be handled with the firm concerned.

The photographs in this catalog were selected and the layouts were prepared by Miss Bertha Gericke, assistant in visual instruction, of the visual instruction and editorial section, Extension Service.

Lester A. Schlup,
In Charge, Visual Instruction
and Editorial Section.

In a Nutshell:

- ✓ ... Contact prints of any miniature picture illustrated in the following pages may be purchased at the contract prices given on the enclosed price list. Sizes of contact prints are either 5 by 7 or $6\frac{1}{2}$ by $8\frac{1}{2}$ inches, depending upon the size of the negative. However, most of them are $6\frac{1}{2}$ by $8\frac{1}{2}$ inches.
- ✓ ... Enlargements and uncolored glass slides may also be purchased at prices specified.
- ✓ ... Purchase orders should give negative numbers and legends of photographs desired and indicate whether contact prints (exact size of negative), glass slides, or enlargements (specifying size) are wanted.
- ✓ ... If prints of any complete layout are desired, give negative number (consult list above) and subject. Prints of the layouts are 8 by 10 inches in size, but enlargements of any size may be purchased.
- ✓ ... Purchase orders made out to the contracting firm should be sent to the Division of Cooperative Extension, U. S. Department of Agriculture, Washington, D. C. They will be transmitted with negatives involved to the contractor, who will deliver the material direct with a bill for the amount.
- ✓ ... Payments for orders should be made direct to the contracting firm.
- ✓ ... Consult enclosed list for names of contracting firms and current prices. Prices are subject to change at the end of each fiscal year. Write for new price list if yours is out of date.
- ✓ ... Consult list at end of catalog for subjects of available photographs not illustrated.
